I CLAIM:

- A method of inhibiting tumor cell growth in a tumor cell that over-expresses thioredoxin comprising contacting said tumor cell with a cell growth inhibiting effective amount of an inhibitor of thioredoxin expression.
- 2. A method of reducing inhibition of apoptosis in tumor cells that over-express thioredoxin comprising contacting said tumor cells with an effective amount of an agent that inhibits thioredoxin.
- 3. A method of identifying an agent that inhibits tumor cell growth in cells that overexpress thioredoxin comprising

measuring thioredoxin expression in a first sample of said cells;

contacting a second sample of said cells with an agent to be tested;

measuring expression of thioredoxin in said second sample;

comparing expression of thioredoxin in said first sample and said second sample;

whereby a decrease in expression of thioredoxin in said second sample is

indicative of an agent that inhibits tumor cell growth.

4. A method of identifying an agent that reduces inhibition of apoptosis in a tumor cell that over-expresses thioredoxin comprising

measuring thioredoxin expression in a first sample of said cells;

contacting a second sample of said cells with an agent to be tested;

measuring expression of thioredoxin in said second sample;

comparing expression of thioredoxin in said first sample and said second sample;

whereby a decrease in expression of thioredoxin in said second sample is

indicative of an agent that reduces inhibition of apoptosis.

- 5. A method of identifying an agent that reduces inhibition of apoptosis in a tumor cell growth.
- 6. A method of stimulating cell growth comprising introducing a nucleic acid encoding a human thioredoxin having Ser at amino acid reside 73 under conditions whereby said nucleic acid is expressed.
- 7. A composition comprising an agent that is useful in reducing or eliminating thioredoxin-associated apoptosis inhibition and an acceptable carrier.
- 8. A composition comprising an agent that is useful in inhibiting thioredoxin stimulated cell growth and an acceptable carrier.
